WHO WE ARE

The incidence of disability has increased globally to approximately 15% of the population, yet this large portion of our population remains marginalized, excluded and unaware of their rights.

Western Cape APD is committed to addressing this inequality by continually developing the provision of support for persons with disabilities and promoting best practice throughout the Western Cape, in collaboration with partner NPO's, State Departments and others.

OUR MISSION AND VISION

We envision an inclusive society in which persons with disabilities are equal and active citizens, and in order to achieve this, we work together with persons with disabilities and their families in facilitating social development and upliftment services whereby they take the lead in removing barriers and achieving independence.
