**WESTERN CAPE
ASSOCIATION FOR
PERSONS WITH
DISABILITIES**

TM: WCAPD

Are you looking for a fully accessible venue?

Our newly renovated boardroom situated at 320 Koeberg Road, Tijgerhof, Milnerton is wheelchair accessible and has been equipped with an Induction Loop system and noise-reduction curtaining, ensuring full participation of persons with hearing loss using hearing aids or cochlear implant systems.

Our break-away room is ideal for small group discussions & is capable of seating 4 persons comfortably around a table. This room has the same visual aids as well as a 40" TV screen able to convert to an interactive whiteboard, but does not have a loop system.

What is an Induction Loop system?

An induction loop allows users with a telecoil equipped hearing device (switched to the T or MT position) or anyone wearing an Induction Loop Receiver to listen inductively to sound transmitted through a magnetic field without the interference of background noise. The telecoil in a hearing aid picks up the sound via the magnetic field generated by the diaphragm coil laid around the room.

Benefits

*Secure, off-street parking * On MyCiti route*

Audio visual equipment

*Digital projector (provide own laptop) * Interactive whiteboard * Skype video *
Telecoil loop system * Flipcharts * PA system*

Other facilities (by prior arrangement)
